

16th Australian Conference on Optical Fibre Technology Adelaide, 1-4 December 1991

Proceedings were published by IREE, Edgecliff NSW

ISBN: 0 909 394 27X

The Australian Optical Society (AOS) has digitised the contents/index pages of this conference*.

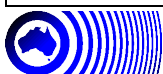

The conference volume contains the individual papers, and is held by one or more libraries in Australia; please refer to the website:

Authors	Paper title	Page
B.L. Board	Premium performance optical connectors for future applications	1
J.S. Harper & N. Wolstencroft	Measurement of connector reflections using coupler and OTDR techniques	5
G. Thambythurai et al	Return loss measurement of an installed optical fibre link	9
R. Heckingbottom	Optical networks in the 1990's and beyond	13
G.I. Stegeman	Ultrafast all-optical switching: Fiber versus integrated optics	17
L. Poladian et al	Exploiting gain and loss in nonlinear couplers	21
Y. Chen & J. Atai	Nonlinear couplers composed of different nonlinear cores	25
H.T. Tran & A. Ankiewicz	A novel self-induced planar coupler	29
W.S. Wassef et al	Theory of fused nonlinear optical fibre couplers	33
B. Wu & P.L. Chu	Optical switching in twin-core erbium-doped fibres	37
J.D. Love et al	Tapered optical fibres: optimal use of nonlinearities	40
Y.L. Xue & P.L. Chu	Nonlinearity of erbium-doped fibre at signal wavelength	44
H.P. Chan et al	Effects of phase-front accelerator designs on non-symmetric y-branch waveguides	48
W.M. Henry	Modes and power splitting in a 5 x 5 coupler with application to coherent detection	52
J.D. Love & L. Lemer	Anomalous coupling in asymmetric tapered single-mode couplers	56
D.R. Rowland & A.W. Snyder	Low power fiber coupler devices: few vs many period operation	60
J. Katsifolis & M.W. Austin	Fabrication and modelling of LiNbO_3 directional couplers	64
M. Aquilina & M.W. Austin	Modelling and fabrication of optical GaAs/GaAlAs directional couplers	68
A. Ankiewicz & G.D. Peng	Soliton generation and conversion using nonlinear fiber couplers	72
Y. Chen & J. Atai	Absorption and amplification of dark solitons	76
X. Yang & B. Luther-Davies	Experimental studies of the stability of fundamental dark spatial solitons	80

K. Kannan et al	High sensitivity receiver preamplifier	84
M.S. Park et al	Wideband, ultra-low noise PIN-HEMT lightwave receivers	88
E Stumpf et al	Modelling the high frequency performance of MSM photodetectors	92
A.M. Bartos et al	Characterisation of high speed photodiodes using a passively modelocked fibre laser	96
T. Tajima et al	2.4Gb/s optical transmission experiment using an electro-absorption modulator and an optical fibre amplifier	100
P.A. Miller	An analogue switched videoconference system	104
Y.M. Choi & D. Mason	Direct modulation of a microwave fibre-optic link	108
M.J. Klein & E. Tirtaatmadja	Synchronous digital hierarchy (SDH) optical fibre network: availability and protection issues	112
T. Wallis	Use of ribbon fibre technology in Telecom Australia	116
P. Boss et al	Evaluating optical fibre cables and ploughing techniques for the Telecom Australia rural customer access network	120
R. Carruthers	FTTCP in Australia	124
B.M. Smith et al	System limitations for cascaded optical amplifier systems	125
B.R. Clarke	Optical FSK direct detection system performance	129
M.J. Pettitt	The application of optical amplifiers to optical analogue video distribution systems	133
G.J. Semple et al	Fibre delivery of video for business customers	137
C. Mott	Analysis of error rate for long haul optical amplifier systems with allowance for gain saturation and spectral shape of ASE	141
C.N. Munenen & A.J. Lowery	Lightwave systems modelling using the transmission line laser model	145
N.T. Dang	Investigation of the transmission of data through a chain of EDFA repeaters using a recirculating loop	149
K.E. Alameh & R.A. Minasian	Er ³⁺ fibre amplifiers in direct and externally modulated SCM lightwave distribution systems	152
M.E. Femwann	Ultra-short pulse fiber laser sources	156
H.S. Mackenzie et al	Low-threshold tapered optical fibre dye laser	165
G.W. Bryant	Michelson interferometry for the characterization of pulsed optical fibre sources	168
P.J. Edwards	Sub-shot noise and correlated-beam operation of laser and light-emitting diodes	172
M. Gourlay	Achieving quiet operation of a 1.523µm helium neon laser for optical fibre sensors	175
E.C. Magi	Discussion on theoretical model of a passive method for suppression polarisation induced signal fading in fibre optic sensors	179
D.A. Thorncraft et al	An ultra high resolution distributed temperature sensor	183
Z.Y. Zhu et al	Temperature switch based on optical bistability	187
R. Barrow & R.W.C. Vance	Concentric-waveguide optical fibre for sensing applications	190
R.W. Boswell et al	Planar optical waveguides R & D at the Australian National University	194
G. Giroult-Matlakowski	Plasma assisted deposition and etching of thick silicon dioxide layers, using the helicon diffusion reactor, for optical waveguides on silicon	198
J.D. Love & F. Ladoucer	Loss mechanisms in buried channel planar waveguides	202
E.Y.B Pun et al	Characterization of proton-exchanged LiTaO ₃ fabricated using phosphoric acid	206
S.F. Collins et al	Intensity chirped laser diode modulation techniques for fibre optic based ranging applications	210

S.O. Martin et al	A white light wedge interferometer and an optical fibre pressure sensor	214
P. Coghill et al	A high responsivity fibre optic magnetic field transducer	218
L.G. Clarke et al	A spun elliptical core optical fibre for electric current measurement	222
G.D. Peng & A. Ankiewicz	Generalized Gaussian approximation for single-mode fibres	226
K.S. Chiang	Intrinsic birefringence in a stress-induced birefringent fibre with nonuniform elastic properties	230
C. Kocsis	Strictly bend coupler based attenuation measurement technique for local applications-OPTITEST	234
R.C. Hsieh et al	Lifetime of optical fibres installed in underground plant	238
Y.N. Le	The concatenation property of chromatic dispersion of single mode fibre	242
P. Ostojic	Static fatigue in silica optical fibres	246
Y. Zhao & I.M. Bassett	Non-local birefringence in spun rectangular core fibre	250
M. Xing & P.L. Chu	Design of temperature independent spun elliptical fibres	254
P.C. Hills & P.J. Samson	Developments in optical fibre safety standards	258
G.R. Atkins et al	Control of the radial defect distribution in optical fibres through electron trapping	262
T. Tjugiarto et al	Fabrication and characterization of twisted twin-core fibres	266
J.D. Love et al	Vector modes of d-shaped fibers	270
A. Dickson et al	Programmable fibre loop memory	274
E. Jaatinen & B. Luther-Davies	Single mode output from multimode fibres using a semilinear phase conjugate mirror	278
T. Ooka & K. Umezaki	A continuously variable optical attenuator for SDH optical module measurement	282
Y.H. Ja	A for port optical fiber loop resonator using a 3 x 3 fiber coupler and degenerate two-wave mixing	286
Y.H. Ja	A vernier fiber double ring resonator using degenerate two-wave mixing	290
P.L. Chu & G. Hewa-Gamage	Polarisation-independent broadband optical wavelength filters using optical waveguides	294
J.H. Hayward & R.A. Minasian	Erbium amplifier recirculating optical delay line	298
M.G. Sceats	Stress relief - the mechanism of photo-induced refractive index control in fibre cores	302
K.S. Chiang	Stimulated Raman scattering in a multimode optical fibre: evolution of modes in stokes waves	306
N.N. Akhmediev and R.F. Nabiev	Modulation instability of the ground state of cylindrical waveguide: optical machine-gun	310
X.H. Wang & G.K. Cambrell	All-optical switching and bistability phenomena in nonlinear optical waveguides: Part I power dispersion relations	314
X.H. Wang & G.K. Cambrell	All-optical switching and bistability phenomena in nonlinear optical waveguides: Part II propagation properties	318
D. Bakewell	Large signal model of a semiconductor optical amplifier	322
S.C. Guy et al	Influence of stress on the low-temperature homogeneous linewidth in erbium doped fibres	326
P.A. Krug et al	Intermediate excited state absorption in erbium doped fibre power amplifiers pumped in the 980nm band	330
N. Granpayeh et al	A mathematical model of temperature dependence of fibre amplifier gain	334

D.G. Schadt	Four-wave mixing in phase modulated multichannel coherent systems using cascaded optical amplifiers	336
F.F. Ruhl	Potential of doped fibre amplifiers for the 1300nm and 1550nm optical communication windows	340
S. Goh et al	Absorption and fluorescence characteristics of Pr ³⁺ -doped fluorozirconate glass for 1.3 μm applications	344
P. Farrell	Cooperative upconversion in erbium doped fibres	348
D. Novak & M.L. Majewski	Temperature and optical gain nonlinearity effects on the maximum modulation bandwidth of semiconductor laser diodes	352
R.A. Pattie	The development of high power 980nm laser diodes	356
K. Hinton & T. Stephens	Laser diodes for high speed IM/DD optical systems	360
G.J. Cowle	Single-longitudinal-mode fibre loop laser	364
A. Zaheer et al	Auto- and cross-correlation measurements in high repetition rate mode-locked semiconductor lasers	368
L. Zhai et al	Stability range of harmonically mode-locked semiconductor lasers	372
A.J. Keating & A.J. Lowery	Characterisation and modelling of tunable DBR lasers	376
K. Sasaki & K. Kuroda	A practical laser power standard	380
J.R. Groom	The optical fibre cable crossing of Spencer Gulf	384
C.L. Hogg and P. Huang	Crush resistance parameters of loose tube optical fibre cables and the application to cable design	388
B.N. Murrihy	Recent advances in optical fibre cabling systems	392
M.R. Stacey et al	An optical cord deployment and retrieval system for remote vehicle communication	396
