

17th Australian Conference on Optical Fibre Technology Hobart, 29 November - 2 December 1992

Proceedings were published by IREE, Edgecliff NSW

ISBN: 0 909394 30 X

The Australian Optical Society (AOS) has digitised the contents/index pages of this conference*.

The conference volume contains the individual papers, and is held by one or more libraries in Australia; please refer to the website:

Authors	Paper title	Page
P Green	All optical networks, the solution for gigabit per node applications	1
P Cochrane & D Heatley	Future developments in Gbit optical fibre systems	6
P O Andersson & K Akermark	A 225km, 2.5 Gb/s, system experiment using a directly modulated 1.55um DFB laser on nondispersion shifted fiber	14
K Hinton & T D Stephens	Adiabatic, wide linewidth laser diodes for high speed, high dispersion intensity modulated optical systems	18
P A Krug, D M Spirit & L C Blank	Transmission study of optical pulses at 6.2 Gbit/s generated using LiNbO ₃ modulators to externally modulate cw semiconductor lasers	22
K Kannan, S J Frisken & P S Atherton	Bidirectional transmission system over a single fibre using optical amplifiers in a dual role	26
G Day, M N Deeter & A H Rose	Faraday effect current sensors	30
I G Clarke, I M Bassett & S B Poole	A temperature stable spun birefringent optical fibre current transducer	38
E C Magi	A technique for measuring both acoustic and thermal sensitivity of fibre optic hydrophone transducers	42
P J Samson & A D Stuart	Fibre optic methane measurement by wavelength scanned interference filter	46
G W Bryant	Optical fibre distributed temperature sensing at an electrolytic manganese dioxide plant	50
M Shikada	Recent technologies for high speed non-repeated long distance transmission	54
R W Ayre, T D Stephens & F F Ruhl	Limits for single-span transmission systems without intermediate repeaters or in-line amplifiers	58
F F Ruhl & R W Ayre	Interplay between gain and unregenerated distance in multi-channel systems with optical fibre amplifiers	62
F F Ruhl	Praseodymium doped fibre amplifiers for the 1300nm window	66
S J Frisken	Isolated bidirectional amplification employing polarisation duplexing	70

K Kannan	Effect of ambient temperature on the performance of erbium doped optical fibre amplifier module	74
G D Peng, T Tjugiarto & P L Chu	Polarization maintaining composite fibres and their device applications	78
A L G Carter, S B Poole & M G Sceats	A flash-condensation technique for the fabrication of high phosphorus content rare-earth doped fibres	82
Y L Xue & P L Chu	Pump-induced refractive index change rare-earth doped fibre	86
D Wong, S B Poole & M G Sceats	Stress-relief in optical fibres by uv irradiation	90
A A Stashkevich & V V Matyushev	Diffraction of guided light by magnetostatic waves and its applications to integrated-optical light modulators	94
H Hatami-Hanza & P L Chu	Low loss waveguide-bend configuration with curved corner reflectors	98
A Malag, J M Kubica, J Gazecki, M W Austin & G K Reeves	AlGaAs/GaAs antiresonant reflecting optical waveguides	102
E Y B Pun, P S Chung, W K Lueng & C S Ho	Ion-exchange glass waveguide using mixed nitrate melt	106
A Paradisi & I Montrosset	All-optical switching of bistable laser diodes: a comparison between numerical and experimental results	110
D Body & B Luther-Davies	Towards a short pulse waveguide laser	114
N Onodera, A J Lowery, L Zhai, Z Ahmed & R S Tucker	Demonstration of frequency multiplication in external cavity mode-locked semiconductor lasers	118
K A Ahmed, H F Liu, N Onodera, P Lee & R S Tucker	Generation of nearly transform-limited pulses < 4ps from a gain-switched 1.55um distributed feedback laser using fiber compression	122
Z Ahmed, N Onodera & R S Tucker	Spectral measurements of absolute timing jitter in actively mode-locked semiconductor lasers	126
W D Gillie & S Rozenthal	Developments in telecom Australia's FTTC field trial	130
P Sim, J Del Papa & M Johannessen	Residential access network system for delivery of fibre to the customer's premises	134
T M Wallis	A ribbon fibre installation trial	138
S Forouhar, D L Crawford, A G Larsson & J-M P Delavaux	High power pump lasers for doped fibre amplifiers	142
W F Ngai & H F Liu	Instabilities and chaos in a directly modulated 1.55um in GaAsP distributed feedback laser diode	146
T B Anderson & B R Clarke	On determining the stochastic behaviour of a modulated semiconductor laser	150
G E Town, M G Sceats & S B Poole	Passively modelocked fibre laser stability	154
Y Zhao, S B Poole & M G Sceats	A model for a Pr ³⁺ -doped fluoride fibre upconversion laser	158
W Morey, G Meltz, G A Ball, J R Dunphy & F X D'Amato	In-fibre Bragg gratings	162
L Poladian, J E Sipe & C M de Sterke	Behaviour of chirped and tapered gratings	170
R A Betts, N T Dang, S J Frlsken & P S Atherton	The Sagnac loop gate - an ultra fast, all-optical switching device	174
S C Goh	Raman shifted light source for optical fibre testing	178

Y H Ja	A two-channel wavelength division demultiplexer using a s-shaped two-coupler fiber ring resonator	182
N N Akhmediev & J M Soto-Crespo	Generation of a train of three-dimensional optical solitons in saturable self-focusing media	186
K S Chiang & R A Sammut	Study of planar waveguides with self-focusing nonlinearity by the effective-index method	190
B Luther-Davies	Steerable optical waveguides formed in self defocussing media using dark spatial solitons	194
G E Smith & I A White	Optical fibre reflectometer sensor	198
Y Hirose, H Itoh & Y T Suzuki	Fiber-optic vibration sensor stabilized by optical phase locked loop with automatic gain control	202
E E Tapanes, A J Hill & P L Rossiter	Development of intrinsic fibre optic evanescent-wave sensor for in-situ cure monitoring of polymeric materials	206
E E Tapanes & P L Rossiter	Practical application of fibre optic sensors to engineered structures	210
J M Koo & H F Liu	Nonlinear amplification of ultrashort pulses in erbium-doped fibre amplifiers	214
W Zhang & P L Chu	The nearly-degenerate four photon mixing in a multi-wavelength erbium-doped fiber amplifier	218
Sumneriieid & R S Tucker	1.6 THz frequency conversion by four-wave mixing in a 1.55 μ m travelling wave optical amplifier	222
G J Cowle	Broadening of narrow-linewidth signals due to fibre amplifier phase noise	226
W Krolikowski & B Luther-Davies	An analytic solution for soliton propagation in a nonlinear saturable medium	230
K C Chan & H F Liu	Preservation of soliton behaviour of chirped pulses in lossy monomode optical fibres	234
A W McCord, S Hanson & R J Ballagh	Phase singularities in soliton propagation	238
K C Chan & H F Liu	Effects of Raman scattering and frequency chirping on soliton effect pulse compression	242
M J Lederer, I M Skinner & P L Chu	Influence of delayed nonlinearity on soliton propagation in materials with saturable nonlinearity	246
M J Steel & C M de Sterke	Gap solitons with gain and two-photon loss	250
H P Chan & P S Chung	Phase front accelerator effects in truncated structural γ -branch waveguides	254
M Aquillina & M W Austin	Mode coupling in the transition section of an asymmetric directional coupler	258
L Lerner & J D Love	Non-adiabaticity in tapered asymmetric couplers	262
P L Chu, B A Malomed & G D Peng	Soliton state and bifurcation in nonlinear fibre coupler - analytical results	266
S Johnston & M Hesling	Fabrication of low loss wavelength flattened 1x3 single mode couplers	270
B Wu & P L Chu	Transient switching in erbium-doped twincore fibre couplers	274
D Novak & R B Waterhouse	Design and development of transmit and receive modules using optical-fibre and microstrip patch technology	278
P W Leech, P C Kemeny, J Thompson & M Faith	Metal-semiconductor-metal (MSM) photodetectors in mercury cadmium telluride	282
D G O'Brien	Broadband matching to photonic devices using commensurate lines	286
S Park & R A Minasian	Low-noise PIN-HEMT optical receiver for 10 Gbits/s transmission systems	290

E Stumpf & L W Cahill	Modelling nonlinear effects in MSM photodetectors	294
A Kwan, L S Fock & R S Tucker	Distortion reduction in feedforward compensation system	298
A T Pham	Analogue-pulsed single-subcarrier modulation techniques for the transmission of multichannel video over fibreoptic links	302
K E Alameh & R A Minasian	Nonlinear distortion and fibre amplifier optimisation in SCM CATV video transport system	306
P J Edwards	Proposal for an ultra low-noise squeezed light amplifier	310
Y H Ja	Phase sensitivities of the output intensities of some fiber ring resonators with one- or two couplers	314
P C Kemeny	Fibre to the customer premises (FTTCP): choosing a network topology	318
J Hubregtse	Fibre to the customer premises (FTTCP): specifying optoelectronic components	322
G Edwall	Analysis of the main cost contributors to a shared passive optical subscriber access network	326
C Lermينياux	Ion exchange devices	330
G Giroult-Matlakowski, S Armand, M Jarnyk & R W Boswell	Low temperature plasma assisted deposition of thick silica layers (1 μ m - >20 μ m) for optical planar waveguide devices, using the helicon diffusion reactor	332
P L Chu, T Tjugiarto, M Gross, E Gauja, T W Whitbread, J W Arkwright & P M Allen	Fabrication of silica based waveguides	336
F Ladouceur, J D Love & T J Senden	Surface roughness in buried channel waveguides	340
N T Dang & S J Frisken	A technique for transmitting data beyond the dispersion limit	344
R M Fortenberry, Y Cai & R S Tucker	Optically transparent node for multiple bit-rate photonic local area network	348
A J Keating & A J Lowery	Transmitter wavelength stabilisation in multi-wavelength packet	352
N N Akhmediev & A Ankiewicz	Amplification of nonlinear guided waves	356
H T Tran	Stability of nonlinear surface and guided waves	360
A Ankiewicz, N N Akhmediev & H T Tran	Analytic determination of stability of even and odd waves of nonlinear planar waveguides	364
M Gu & C J R Sheppard	Fibreoptical confocal scanning microscopy in metrology imaging of a straight edge	368
K S Chiang	Four-wave mixing in a two-mode fibre: a novel method for the measurement of intermodal dispersion	372
C Lindsay, I G Fuss, S C Troedson & G A Knight	A sub-picosecond electro-optic sampler for device characterisation applications	376
W M Henry, J D Love & G D Peng	Anomalous loss in a depressed-cladding and w-planes	380
S J Hewlett, J D Love & T Tjugiarto	Polarisation coupling in twin-elliptical-core optical fibres	384
K M Lo, R C McPhedran, I M Bassett & G W Milton	An electromagnetic theory of optical fibre with multiple embedded cylinders	388
