

27th Australian Conference on Optical Fibre Technology Sydney, 8-11 July 2002

Proceedings were published by Photonics Institute Pty Ltd and Engineers Australia

ISBN: 0-9581182-0-5

The Australian Optical Society (AOS) has digitised the contents/index pages of this conference*.

The conference volume contains the individual papers, and is held by one or more libraries in Australia; please refer to the website: <http://optics.org.au/ACOFT>

Authors	Paper title	Page
Sceats, M	Photonics - Physics and Industry - Today and Tomorrow	
Ishak, W	The new economy of light: taking a bite out of the price per bit in communication networks	
Bao, H	Broad band amplitude noise of 40GHz subharmonically synchronous mode locked pulses	1
Dods, S	Simplified method for calculating power penalties due to interferometric crosstalk from single or multiple interferers	4
Wen, Y J	Impact of carrier pulse shape on 40Gb/s based DWDM transmission	7
Safaei, F	A comparative study of optical network architectures	
Aslund, M	Add-drop multiplexing through dispersion inverted interference	10
Luther-Davies, B	Inorganic polymer glasses for integrated optics	13
Au, V	Stress and mode characterisation of HARE deposited films and rib waveguides	15
Tomljenovic-Hanic, S	Planar waveguide add/drop wavelength filters based on segmented gratings	19
Ashton, B	Two-point source grating writing methods	23
Buryak, AV	Optimisation of refractive index sampling for multi-channel FBG devices	26
Tomljenovic-Hanic, S	New design of variable optical attenuator based on a bent channel waveguide	29
Canning, J	Wavelength dependent leakage in a Fresnel—based air-silica structured fibre	32
Collins, SF	Modelling of concentration dependence of fluorescence from neodymium-doped optical fibres and its application to strain and temperature sensing	35
Lu, Y-B	Optical switching using dual—core erbium doped fibre	38
Ruan, Y	Optical nonlinearity of chalcogenide glasses for photonic devices	41
Town, G	Scaled-cladding designs for microstructured refractive index guiding optical fibres	44
Mitchell, A	Automatic synthesis of microstructured holey optical fibre using numerical optimisation	47
Bulla, D	Ge-doped silica optical waveguide fabrication by HARE-PECVD	50
Grant, G	Ion beam written gratings in multimode fibre	53

Ganeshkumar, G	Comparison of responsivity of in different fibres using UV irradiation at 246nm	56
Liu, Y	Study of the enhancement of acousto-optic effect by off-centre fibre	59
Akhmediev, NN	Optical soliton solutions of the quintic complex Swift-Hohenberg equation	62
Michna, ML	Characterisation of induced axial stress in bent optical fibres	65
Li, WT	Reactive Evaporated Ge—SiO ₂ Thin Films for Planar Waveguide application	68
Kristensen, M	Integrated photonic crystal waveguide technology in Europe	Addendum (2)
Issa, N	Vector wave equation expansion method for leaky modes in microstructured optical fibres	72
Zhao, YC	Interferometric chromatic dispersion measurement of short length of MPOF	75
Large, M	Novel microstructured optical fibres fabricated in polymer	78
Bassett, I	Single non-degenerate mode propagation in air-core Bragg fibres	81
Town, G	Optical continuum generation with nanosecond pump pulses in an irregularly microstructured optical fibre	84
Canning, J	The Fresnel waveguide	86
Ibsen, M	Advanced grating components and where they are going	89
Sukhorukov, A	Novel design of lossless planar x-junctions with variable transmission coefficients	92
Kruglov, VI	Exact soliton solution of the nonlinear Schrodinger Equation with distributed gain and anomalous group velocity dispersion	95
De Sterke, M	Investigation of dispersion effect on the bandwidth of parametric amplification	98
Buryak, A	Correction of systematic errors in FBG fabrication process	101
Riant, I	Fibre components for systems: where they are going?	104
Kruhlak, R	Permanent refractive index modification in Ge-doped optical fibres using red light	107
Ashton, B	DG-only apodisation of fibre Bragg gratings	110
Marra, C	Spectral optimisation of multi phase-shifted fibre Bragg gratings with multiple bandpass peaks	113
Liu, HY	Type I and type II Bragg gratings formation in polymer optical fibre	116
Koch, M	Patents in Photonics	
Sampson, D	Optical coherence tomography: technology and applications	
Wade, S	Annealing effects in optical fibres used in fluorescence-based temperature sensing	119
Trpkovski, S	Dual strain and temperature sensor using a fluorescence intensity ratio in Er ³⁺ -doped fibre combined with a fibre Bragg grating	122
Hill, P	Automation in manufacture of photonic components	
Gibson, B	Tapered air-silica microstructures for evanescent field sensing	125
Ampem-Lassen, E	Refractive index profiling of axisymmetric optical fibres using quantitative phase microscopy	128
Katsifolis, J	Low—loss, ultra-tight bends using tapered optical fibres	131
Lyttikainen, K	Numerical simulation of a speciality optical fibre drawing process	134
Grattan, K	Optical fibre sensors for temperature and strain determination: applications to industrial monitoring	AOS/ACOFT
Roberts, A	New directions in optical fibre characterisation	“
White, T	Dispersion and structural losses in photonic crystal fibres	“
Botten, L	Propagation in straight and bent photonic crystal waveguides	“
Botten, L	Photonic bandgaps in woodpile structures	“
Canning, J	2D array structures in planar waveguides using periodic hypersensitisation	“
