

Australian Conference on Optics, Lasers & Spectroscopy 1987

Surfers Paradise, 11 – 15 May

The Australian Optical Society (AOS) has digitised the contents/index pages of this conference*.

The conference volume contains the individual papers, and is held by one or more libraries in Australia; please refer to the website: <http://optics.org.au/AOS-Conference>

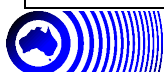

Authors (program lists oral presenting author only)	Title	Page
	Oral Sessions	
	MONDAY 11 MAY	
RL Byer	Laser Conference Lecture: Advances in diode pumped solid state lasers	MA1
GK Reeves	Laser diode light sources for optical communications	MA2
RS Seymour	Some recent developments with two Nd ³⁺ lasers	MA3
RC Tobin	Compact multiwavelength unheated metal vapour laser	MA4
L Piper	The future of metal-vapor based laser systems	MA5
J Wolfrum	Laser spectroscopy and mathematical modelling of complex chemical reacting systems	MC1
I Plumb	Chemistry of the plasma etching process	MC2
RJS Morrison	Laser ionization and emission spectroscopy of transient species: studies in corona and pulsed discharge excited supersonic expansions	MC3
P Andresen	Dependence of product state distributions on the initial s states of the parent molecules in the photochemistry of small molecules	MC4
	TUESDAY 12 MAY	
D Walls	Generation and applications of squeezed states of light	TA1
H-A Bachor	Mode squeezing and QND measurements in optical fibres	TA2
D Pegg	Amplification of squeezed light	TA3
J Cresser	Quantum theory of frequency filtered photon detection	TA4
G Milburn	Homodyne detection and quantum measurement theory	TA5
S Harochg	Atomic physics in micron-sized cavities: Suppressing spontaneous emission at optical frequency	TA6
RD Brown	Understanding kinky molecules	TC1
AR Col	Infrared spectra of complex molecules at 0004 cm ⁻¹ resolution	TC2
ST Gibson	Decomposition of the VUV absorption spectrum of O ₂ from measurements of O(1D) fluorescence	TC3
W Demtroder	Laser spectroscopy in cold molecular beams	TC4
DA Ramsay	The spectra of comets Halley and Wilson	TC5
H Inaba	The BHP Lecture: Review of laser gas sensing	LRS1
JC Scott	Methane gas detection using a pulsed Nd:YAG laser	LRS2

F Jacka	A Lidar system for stratospheric studies	LRS3
D Booth	Lidar remote sensing at CSIRO Division of Atmospheric Research	LRS4
B Orr	Coherent Raman spectroscopy applied to remote sensing	LRS5
P Samson	Remote Raman spectroscopy employing optical fibre guides	LRS6
L Whitbourn	Development of an airborne CO ₂ laser system for active remote sensing of minerals	LRS7
J Haub	Remote sensing of coal	LRS8
G Paul	Industrial applications of laser induced breakdown spectroscopy	LRS9
IS Falconer	Laser diagnostics of plasmas and gas discharges: From ultra violet to submillimetre	TA7
AJD Farmer	Spectroscopic diagnostics for free-burning arcs	TA8
WA Peebles	The development of stable, high power, twin frequency optically pumped far-infrared lasers for fusion plasma diagnostics	TA9
BW James	Observation of beats during triple cascade operation of submillimetre lasers implications for plasma diagnostics	TA10
M Collins	Classical studies of intramolecular vibrational energy transfer via fermi resonance	TC6
WD Lawrance	Intramolecular vibrational energy redistribution in the onset region	TC7
SH Kable	Unified view of vibrational relaxation in polyatomic molecules	TC8
KD King	Collisional energy transfer from infrared multiphoton experiments	TC9
	WEDNESDAY 13 MAY	
RM Lowe	Transmission Zeeman beat spectroscopy: An accurate technique for determining depolarisation rates in atomic ground States	WA1
JF Williams	Time-dependent Stark-perturbed Stokes parameters of the 2S and 2P States of atomic hydrogen	WA2
P Hannaford	High resolution laser spectroscopy with sputtered atoms	WA3
MC Standage	Applications of laser spectroscopic techniques to atomic collision studies	WA4
PJO Teubner	Electron photon coincidence studies in metal vapors	WA5
J Eberhardt	Rapidly tuned CO ₂ lasers for remote sensing	WC1
M Waterworth	Applications of high powered lasers to ignition and other processes	WC2
CJ Walsh	The development and application of CO ₂ waveguide lasers in metrology and medicine	WC3
SC Goh	Laser Raman spectroscopic study of amorphous silicon solar cells	WC4
RWT Wilkins	The Laser Raman microprobe: A tool for industrial research in the geo-sciences	WC5
JL Hall	Toward the ultimate atomic spectroscopy	WA6
J Mazurnder	Keynote address: The state-of-the-art of laser materials processing	IMP1
L Bruce	The laser lab 5-axis cutting head	IMP2
J Kavanagh	Design and engineering aspects of CO ₂ laser industrial job shop systems	IMP3

K Crane	Industrial materials processing by the CSIRO using CO ₂ and Nd:YAG lasers	IMP4
J Neutzel	Winning through laser machining: Success factors in the formation and growth of three US laser job shops	IMP5
G Paul	A successful industrial application for ultraviolet lasers: Laser curing of coatings and inks	IMP6
B See	Laser maintenance Part 1: Solid state laser systems	IMP7
J Lucas	Laser maintenance Part 2: Servicing of industrial CO ₂ laser systems	IMP8
THURSDAY 14 MAY		
S Hirayama	Chloroplasts in vivo characterized by picosecond UAL fluorescence lifetimes measured under a microscope	THA1
K Ghiggino	Time resolved fluorescence spectroscopy of macromolecules	THA2
KGH Baldwin	Population inversion in a helium excimer molecular beam	THA3
B Peel	Photoelectron spectroscopy of molecular dimers and clusters	THA4
JD Morrison	The laser induced photodissociation spectroscopy of gas phase ions using multiquadrupole mass spectrometers	THA5
JP Maier	Electronic spectroscopy of open-shell polyatomic cations	THA6
GS Agarwal	Higher order AC Stark splittings in nonlinear mixing	THC1
D Warrington	Optical bistability and polarization switching	THC2
PG Brown	Nonlinear optics in monolayers	THC3
YH Ja	Optical phase conjugation with photorefractive	THC4
JA Hermann	Optical limiting using non-linear refraction and absorption	THC5
AC Walker	Optical computing	THC6
FRIDAY 15 MAY		
RP Cooney	FT-IR in electrochemistry	FA1
JW White	Micro electron volt spectroscopy of surfaces using neutrons	FA2
MG Sceats	Small amplitude collective proton motions in water networks	FA3
XG Zhi	Characterization of short lived intermediates	FA4
NB Manson	High resolution laser spectroscopy of solids	FA5
RWG Syme	Laser spectroscopy of rare-earth doped fluorites	FA6
M Wainer	Quentron Lecture: an overview of lasers in medicine	LSM1
P Fredericks	FT-IR spectroscopy: The state of the art	FT1
R Jakobsen	Mattson lecture: biological applications of FT-IR spectroscopy	FT2
R Davidson	Aspects of FT-IR in polymer characterisation	FT3
DN Sims	Digilab Lecture: applications of micro FT-IR spectroscopy in forensic science	FT4
DWT Griffith	FTIR - emission spectroscopy of fire plumes	FT5
B Dawson	Nicolet lecture: applications of FT-IR in forest products	FT6
JN Berube	Bomem Lecture: fluorescence free FT-Raman	FT7
AI McIntosh	Introduction to lasers	
P Bore	Introduction to magnetic resonance	
M Wainer	An overview of lasers in medicine	LSM1
H Baddeley	Magnetic resonance imaging	LSM2
M Irving	Clinical biochemistry and magnetic resonance	LSM3
A Scheibner	Uses of the flashlamp pumped dye laser, the argon and argon/dye lasers in the treatment of cutaneous lesions	LSM4
P Beaumont	Lasers in ophthalmology	LSM5
E Owen	Lasers in surgery	LSM6

	POSTER SESSION A	
J O'Neill, J Orchard, M Chelehmalzadeh, G Wilson & G Paul	Photochemical methods for the epoxidation of propylene	A-1
G Paul, M TeVrucht, E Zochowski, J O'Neill & K Marshall	An FT-IR study of protein adhesion to surfaces	A-2
G Wilson, J O'Neill, G Paul, H Tsuda, A Akerman, D Klick, D Supurovic & P Donders	Industrial applications of UV Lasers: Photopolymerisation	A-3
H Tsuda & J Piper	Design considerations for high-power rare-gas-halide lasers	A-4
J Cresser & M Hillery	Energy filtered photon-photoelectron correlations in two photon ionization	A-5
B Tarte & J Piper	Investigation of lower level effects in discharge excited Sr+ recombination lasers	A-6
D Matthews & J Piper	Three dimensional X-ray source mapping of an inner shell cadmium photoionisation laser	A-7
L Marshall & J Piper	Transient stimulated Raman scattering	A-8
M Ainsworth & J Piper	Copper laser pumped dye oscillator / amplifier systems for cancer photodynamic therapy	A-9
GR Keen , J O'Neill & G Paul	Excimer laser production of ultra-fine metal powders	A-10
J Tann, M Horsburgh, J O'Neill & G Paul	Production of ultrafine powders	A-11
R Walmsley	The design and development of the Australian ophthalmic YAG laser	A-12
E Harvey, A Anders, S Rae & R Tobin	Compact multiwavelength unheated metal vapour laser: production of metal vapour	A-13
A Anders, E Harvey & R Tobin	Compact multiwavelength unheated metal vapour laser: operating characteristics	A-14
J Williams & E Heck	Time-dependent stark-perturbed stokes parameters of the 2S and 2P states of atomic hydrogen	A-15
A Radlinski, A Calka & B Luther-Davies	The effect of picosecond laser treatment on the surface and volume crystallization of metallic glasses	A-16
R Schaeffer & W Jalenak	Frequency stabilization of a tunable diode laser using an internally coupled confocal etalon	A-17
S Kumar & G Agarwal	All order transient response of coherently prepared systems	A-18
A Maddever, B Luther-Davies & R Dragila	Modulation of laser radiation reflected from an expanding laser produced plasma	A-19
D Death, J Haub & J Eberhardt	Characterisation of bulk coal using an ultra-violet laser	A-20
D Booth, S Banks, J Gras & C Platt	Lidar measurement of aerosol backscatter and comparison with Mie calculations using measured aerosol profiles	A-21
P Leech & D Jaffrey	Microstructural refinement of aluminium-silicon based alloys by laser glazing	A-22
G Turner, I Falconer, B James & McKenzie	Monte Carlo simulation of the thermalisation of sputtered atoms and its comparison with spectroscopic measurements	A-23
M Bowden, P Stimson & B James	Scattering of a submillimetre laser from long wavelength density perturbations	A-24
W Wright & I Falconer	Laser-induced fluorescence on Tortus Tokamak	A-25
M Kwietniak, A Radlinski & W Gariat	Photoluminescence of Cd _{1-x} Mn _x Te single crystals	A-26

R Jones & J Swan	Anomalous optogalvanic signals in a neon glow discharge: Observations and discussion	A-27
D Rowland, N Heckenberg & E Dearden	Microwave measurement of the properties of fluidized beds	A-28
P Stimson, L Whitbourn, J Macfarlane, I Falconer & B James	The cascade effect and polarization switching in a far-infrared laser	A-29
D Brown, R Kunnerneyer & A McIntosh	Population dynamics in a small bore copper vapour laser	A-30
A Lindsay, J Nicol, P Baird & D Stacey	Linear and saturated absorption measurements of pressure broadening in helium and neon	A-31
R Kunemeyer, C McLucas, D Brown & A McIntosh	Time resolved measurements of population densities in a Sr ⁺ recombination laser	A-32
R McDuff & N Heckenberg	A single mode pulsed CO ₂ laser for research applications in infrared nonlinear optics	A-33
N Heckenberg, K Skinner, J MacFarlane & L Whitbourn	An RF discharge pumped HCN laser	A-34
J Reppel, M Gourlay & B Frost	Investigations of output irradiance distributions from asymmetrically injected radiation in a cylindrical waveguide	A-35
A Murray, C Webb, W MacGillivray & M Standage	Progress on a stepwise electron-photon coincidence experiment on e ⁻ - Hg collisions	A-36
P Farrell, W MacGillivray & M Standage	Calculation of hyperfine sublevel effects on optical pumping in sodium	A-37
S Braunstein & G Milburn	Models for two quasi-probability distributions of quantum optics	A-38
H-A Bachor, I Littler & P Chapple	Four wave mixing in barium vapour with buffer gas	A-39
P Manson, H Bachor & R Sandeman	A strongly driven, multi-level Doppler broadened system	A-40
M Gourlay & B Frost	Propagation of laser radiation along rectangular light guides	A-41
D Bone, H Bachor & R Sandeman	Level population dynamics in a resonantly pumped barium vapour	A-42
P Kemeny & J Hubregtse	A new 13 micron semiconductor laser/ LED using InGaAs quantum wells	A-43
R Carman & A Maitland	DC electron beam excitation of rare gases with relevance to argon ion and helium/ metal vapour lasers	A-44
P Krug, R Behn, M Dupertuis, I Kjelberg, S Salito & M Siegrist	Time resolved linewidth and lineshape measurements of a pulsed, optically pumped far infrared D ₂ O laser	A-45
A Ernest, W Yumin & S Haydon	CW ring dye laser investigations of pre-breakdown optogalvanic phenomena in hollow cathode and uniform field devices	A-46
H Struve	Determination of centre-of-mass recoil energies by Monte-Carlo simulation of IR multiphoton dissociation of molecular beams	A-47
H Struve	A novel air-cooled high power CO ₂ laser	A-48
B Luther-Davies, A Maddever, A Perry & R Dragila	Laser-produced plasmas: A survey of recent results from the Laser Physics Centre at the ANU	A-49
R Vickers, C Freeth & P Fisher	Piezo-spectroscopy of the C-line of gallium in germanium	A-50

M Sceats et al	Development of a MODE-locked Q-switched cavity dumped Nd: YAG laser at 6 kHz	A-51
POSTER SESSION B		
P Godfrey, R Brown, K Dyllal & D McNaughton	Magnetic hyperfine structure in MW-spectra of formaldehyde analogues	B-1
M Atkinson, D McGilvery, P Godfrey & R Morrison	Two laser pulsed microwave optical double resonance	B-2
K Wiedenmann, R Brown, P Godfrey & B Kleibomer	Excited vibrational states in the MW-spectrum of Fluoroketene CHF ₂ CO	B-3
G Bums, R Brown & P Godfrey	Vibrational satellites in the MW-spectrum of Chloroketene CHClCO	B-4
A Pierlot, R Brown, P Godfrey & D McNaughton	Stark modulated MW-Spectroscopy in a supersonic expansion	B-5
D McNaughton, R Brown, P Elmes & P Godfrey	MW-spectrum and structure of Propadienethione H ₂ C=C=C=S	B-6
D McNaughton & P Godfrey	Rotational spectrum and bending potential of LiOH: A semirigid bender analysis	B-7
R Schaeffer, K Carten, S Kensinger, R Lovejoy & C Chackerian, Jr	Absolute line intensities of ¹² CH ₃ D and pressure broadening coefficients for CH ₃ D-N ₂ and CH ₃ D-H ₂ mixtures	B-8
R Schaeffer, R Lovejoy, W Olson & G Tarrago	High resolution infrared spectrum of ²⁸ SiH ₃ D from 1450 to 1710 cm ⁻¹	B-9
M Buntine, D McGilvery & R Morrison	Multiphoton ionization spectroscopic studies of low frequency vibrational modes in a series of aliphatic aldehydes	B-10
B Lewis, L Berzins, C Dedman, T Scholz & J Carver	Pressure broadening in the Schumann-Runge bands of molecular oxygen	B-11
D Gough & P Hannaford	Isotopic analysis by Doppler-free laser spectroscopy in sputtered metal vapours	B-12
A Willis, D Gough & P Hannaford	Velocity-changing Collision effects on saturated absorption profiles: A study of the 7F ₁ - 7F ₀ 57068 nm transition in samarium	B-13
R McLean, P Hannaford, H Bachor & R Sandeman	Nonlinear level crossing spectroscopy using stepwise laser excitation	B-14
C Bewick & B Orr	Rovibrational energy transfer in D ₂ CO Collisions : Intramolecular V-V transfer	B-15
L Berzins, B Chadwick, R Hynes & B Orr	Rotationally inelastic scattering of glyoxal in a skimmed molecular beam	B-16
S Bramwell, A Ferguson & D Kane	Doppler-free two photon absorption spectroscopy with an fm dye laser	B-17
M O'Dwyer, G Delmenico, D McGilvery & G Rassias	Jet fluorescence of sulfur dioxide	B-18
H Schranz, H Hippler & J Troe	Energy transfer of highly excited SO ₂ molecules	B-19
T Brown, K King, J Zellweger & J Barker	Laser studies of collisional energy exchange between 1,1,2-trifluoroethane and argon	B-20
S Kahle, J Thoman Jr & A Knight	Stimulated-emission-pumping studies of state-to-field vibrational relaxation in SO p-difluorobenzene Collision partner and vibrational level dependence	B-21
D Muller, R McKay, S Kahle, W Lawrance, G Edwards J Hardy, A Rock & A Knight	Vibrational relaxation induced by very low energy collisions in the S ₁ (1B ₃ J) state of naphthalene: A search for resonance enhancement of the cross section	B-22

C Van Zoeren, A Rock, S Kahle & A Knight	Low energy collision induced state-to-state vibrational relaxation in B3rr iodine	B-23
J Thoman Jr, J Steinfeld, Y Engel, R Levine, R McKay, A Uichanco & A Knight	Wide fluctuations in fluorescence lifetimes of individual rovibronic levels in SiH ₂	B-24
M Rainbird, B Webb & A Knight	State-to-state vibrational relaxation in 1B2 1J benzene-d6 induced by low energy collisions with He, H ₂ , N ₂ and Ar	B-25
J Valldorf & P Kuntz	A diatomics-in-molecules model for singly-ionized argon and xenon clusters	B-26
P Burton	Vibration rotation constants for H ₃ ⁺ Isotopomers	B-27
R Rothwell, F Carnovale & B Peel	Photoelectron spectroscopy of the nitrogen dimer, (N ₂) ₂ , and clusters, (N ₂) _n	B-28
R Rothwell, F Carnovale & B Peel	Ammonia dimer studied by photoelectron spectroscopy	B-29
B Peel, F Carnovale & C Wentrup	Dinitrogen sulfide, N ₂ S, revealed by photoelectron spectroscopy	B-30
B Peel, F Carnovale & R Rothwell	Photoelectron spectroscopy of the NO dimer	B-31
D Pullin, D Bruget, M Irvine & K Staffa	Argon Matrix isolation infrared studies of cumulenones	B-32
T Smith & K Ghiggino	Multidimensional fluorescence spectroscopy	B-33
S Ng, A Scully, S Bigger & K Ghiggino	Fluorescence spectroscopy of polymers and polymer photostabilizers	B-34
L Bennett, R Henderson & K Ghiggino	Spectroscopic studies of porphyrin c	B-35
S Hirayama, F Tanako & K Shobatake	Excess energy independent fluorescence decay of isolated 9,10-dicyanoanthracene studied in supersonic free jets	B-36
G Moran & A Hauser	Absorption and MCD Studies of W(CO) ₆ and its photolysis in low-temperature hydrocarbon glasses and polythene films	B-37
K Holliday & N Manson	Optical holeburning in SrWO ₄ :U ⁶⁺	B-38
R Danby, P Fisk & N Manson	Coherent optical effects in a concentrated Eu system	B-39
D Griffith, E Berger, G Schuster & S Wilson	Matrix-isolation-FTIR spectroscopy with an integrating sphere	B-40
R Mayes & D James	A spectroscopic study of solvation and ion association in solutions of lithium salts in ethanol	B-41
Gao Zhen & D James	A spectroscopic study of the energetics of ion association in solutions in water and DMF	B-42
L Rintoul & D James	Rayleigh-Brillouin Intensity ratios of concentrated aqueous electrolytes	B-43
I Jamie & D James	Solvation and association of LiNO ₃ in CH ₃ OH	B-44
W Donovan, R Mayes & D James	Association and solvation properties of metal perchlorates in DMF	B-45
B Collins & D James	A spectroscopic study of the ion / ion / solvent interactions of cadmium nitrate in N,N-dimethyl formamide	B-46
R Durand & D James	Spectroscopic studies of ion-ion and ion-solvent interactions for sodium chlorate in water	B-47
R Cooney, J Bartlett, R Kydd & D Bibby	Raman, luminescence and FT-IR studies of zeolite catalysts	B-48
E Krausz & H Riesen	Excited state Raman studies of Ru(bpy)/+ in solid and rigid phases	B-49

H Griesser & E Blatt	Spectroscopic studies of metal chelation and its role in reducing polymer degradation	B-50
G George, G Friend & T Hamilton	Fibre-optic monitoring of resin cure using FTIR and chemiluminescence	B-51
T Memagh	Analysis of fluid inclusions with the laser Raman microprobe	R-52
W Runciman	The application of crystal field theory to mineralogy	B-53
K Grant, G Paul & J O'Neill	Time-resolved laser-induced breakdown spectroscopy of iron ore	B-54
T Green, M Bakker, T Quickenden, C Freeman & D Sangster	The quenching of the luminescence emitted by electron irradiated and UV excited H ₂ O ices	B-55
M Balcker, T Quickenden & C Freeman	Spectral structure in the UV excited luminescence from purified H ₂ O and D ₂ O ices	B-56
T Quickenden, M Bakker, C Vernon & D Sangster	Light emission from pulse irradiated D ₂ O ice	B-57
T Quickenden & C Vernon	The emission of light by high temperature water vapour	B-58
B Selinger & R Sutherland	Thinking with Fourier	B-59
S Goss, D Anear & J Morrison	An RS 232 front-end processor for spectrometer control	B-60
